Response to Amendment

Applicants' amendment after Final has been entered

Therefore claims 1 to 7 and 21 to 25 as recited in the amendment are currently pending in the application.

Non-elected claims 8 to 20 are cancelled by the amendment after Final.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims (1 and 2), which include the spacing between the first gate electrode of the first MOS transistors and a first contact hole for connecting a wiring to a source region or a drain region of the first MOS transistors is larger than a spacing between the second gate electrode and a second contact hole for connecting a wiring to a source region or a drain region of the second MOS transistors.

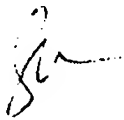

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
